

A proposal will be discussed to start developing the land between 16 and 28 Timberlane Terrace.

- outdoor skating rink with drain and boards for hockey
- “track’ around the outside so that skaters can use the perimeter as well
- create a gravel parking area
- additional lighting as needed
- create natural trails by cutting down some trees where it makes sense
- later put something down to create a more even walking surface
- later, if money and desire existed we could have a pump there for flooding.
- A building there or shelter as it could be a place for gatherings

This will be discussed at the Annual General Meeting on Sunday, February 10, 2013, 2:30 at the Tantallon Library.

Please come to have your opinions heard.
